

TRU PACE Provider List

(May 2025)

At TRU PACE, we contract with local providers in Boulder, Louisville, Lafayette, Longmont, Denver and other areas to ensure participants have access to services not available at the Center.

At TRU PACE you can take comfort in knowing that our caregivers take over the burden of having to navigate the complex healthcare system. We have partnered with our community Specialty Providers to offer a broad and encompassing network to ensure our participant's care needs are met.

Coordinating all your care is an important concept of the PACE model.

Enrolling in PACE means you have access to our PACE center Primary Care Providers as well as our vast network of Specialty Providers. The PACE program partners with participants and families to make health care decisions based on the participant's goals, including specialty care needs.

If you are interested in receiving services from a provider not located on the list, please give the provider's information to your Enrollment Specialist. We are always looking to grow our community specialty provider network.

PACE (CMS) regulations pertinent to PACE community partnerships must be followed during this process. This means partnership with requested facilities and/or providers cannot always be guaranteed.

We are so thankful for the opportunity to be entrusted with all of your primary care and specialty care needs. At TRU PACE our participants always come first. If you would like to receive care with a provider listed below, please be sure to discuss this with your TRU PACE Primary Care Provider.
